

Case Reference: KOL/2019/000535

Mr. Bivas Chakraborty..... Complainant

vs

Ramkrishna Sarada Mission Matri Bhavan..... Respondent/ Respondents

ORDER SHEET

Office Note	Order No.	Date	Order
	1.	31/07/2019	<p>The complaint would relate to physical deformity of a new born child that could not be detected at the stage of pre-natal pregnancy by Anomaly Scan at 20 weeks. On the last occasion we heard the parties and asked for expert opinion of Professor and Head of the Department Radio Diagnosis IPGMR, SSKM Hospital, Calcutta. Accordingly, Prof. Das is present with his report. According to Prof. Das, it was very difficult to detect this deformity even after taking due care while conducting the scan.</p> <p>It is an unfortunate situation in which the parents would have to live with the child and would have to take care of his treatment which is almost an unending process. The Clinical Establishment is a philanthropic organisation. The representative would contend, they are running on deficit, even then they are sympathetic towards the parents and assure us to be by the side of the parents and the child extending assistance to the extent possible. The child is now under</p>

treatment of Dr. Niloy Kanti Das, Paediatrician attached to Institute of Child Health. We would request Dr. Apurba Ghosh, Director of the Institute, to extend best possible assistance to the parents including discount, to the extent possible, on the expense that would be spent by the parents for the treatment of the child. We also permit the patient to take the assistance of our office for all possible assistance including the treatment at the best possible Government Establishment. They would also to be entitled to apply for financial help from the Government and we would assure them to extend all possible help in this regard.

With the above observation we dispose of the case.
